

# RE-ROOFING THE CHURCH

To the Glory of God

## A SPIRITUAL JOURNEY

PRAY that God will be glorified through:

- The dry building which will be achieved
- The generous way that money will be donated
- Everyone in the church family working together in love and unity

WE HAVE A  
GREAT  
OPPORTUNITY  
BEFORE US TO  
WITNESS GOD AT  
WORK IN A VERY  
PRACTICAL WAY

### THE PROBLEM

Our roof leaks and patching is no longer a viable option. The PCC decided that we needed to significantly improve the roof in order to be able to continue to minister to the people of Woodley in the future.

### PROGRESS

Our architect (Neil Barr) was directed by the PCC to produce various possible options. The preferred plan was put to the church for consultation in April 2011. Over 20 people responded with comments which were fed back to the PCC. The comments regarding the bell tower were incorporated and other comments are still being considered.

To help us to envisage the design more clearly, the architect was asked to make a computer generated 3D model. This model will be presented to the church on Sunday 26th June at the 10.30 service.
